

Viz CaptureCast™ and Viz CaptureCast™ Spaces

Viz CaptureCast™ is a centralised network-based appliance, that enables the Capture, Composition, Streaming and Publishing of classrooms, meeting rooms and events; to anywhere in the world - through industry leading integration with Kaltura, Panopto, Opencast and more – all through the power of NDI®.

Build presentation and teaching spaces with ethernet connectivity though simple to use NDI® AV-over-IP devices, such as: Vizrt PTZ Cameras, Viz Connect Solo Converters, even personal mobile devices through the included CaptureCast Camera apps. Then swiftly create fully automated workflows that engage on demand or on schedule.

AV and IT teams can swiftly deploy in room services as needed and presenters can focus on what matters most – telling great stories and educating others, without worrying about the technology behind it.

Now with optional **CaptureCast™ Spaces** subscriptions, you can start with single space workflows, and scale as your AV needs grow.

AV-Over-IP Recording and Publishing

Record up to 6x NDI or NDI|HX inputs across multiple concurrent room Workflows.

Live Broadcast Meets Event Capture

Stream one or multiple inputs to multiple streaming providers while concurrently live recording and publishing.

Power of NDI®

Combining CaptureCast technology and NDI to offer the power and flexibility in AV that only IP Networks can deliver.

Smart Workflows

Automate complex and time-consuming lecture capture workflows through all video production routines.

Video Management System Integrations

Produce seamless end-to-end workflows through multiple virtual Kaltura Resources, Panopto Remote Recorders & Opencast.

Presentation Metadata Extraction

Capture presentation slides and text during a live lecture for video search and enriched playback when published.

Real-Time Encoding

Record and live stream at rates of up to 1080/30p* to deliver best in class video to remote learners.

Flexible Scheduling with Integrations

Built-in event calendar to automate start and stop time of every event for completely hands-off operation, fully synchronized with your Video Management Systems.

Web-Based Control Interface

Configure, manage and control multiple spaces (and workflows) through user friendly browser interfaces and CaptureCast Workflow Wizards.

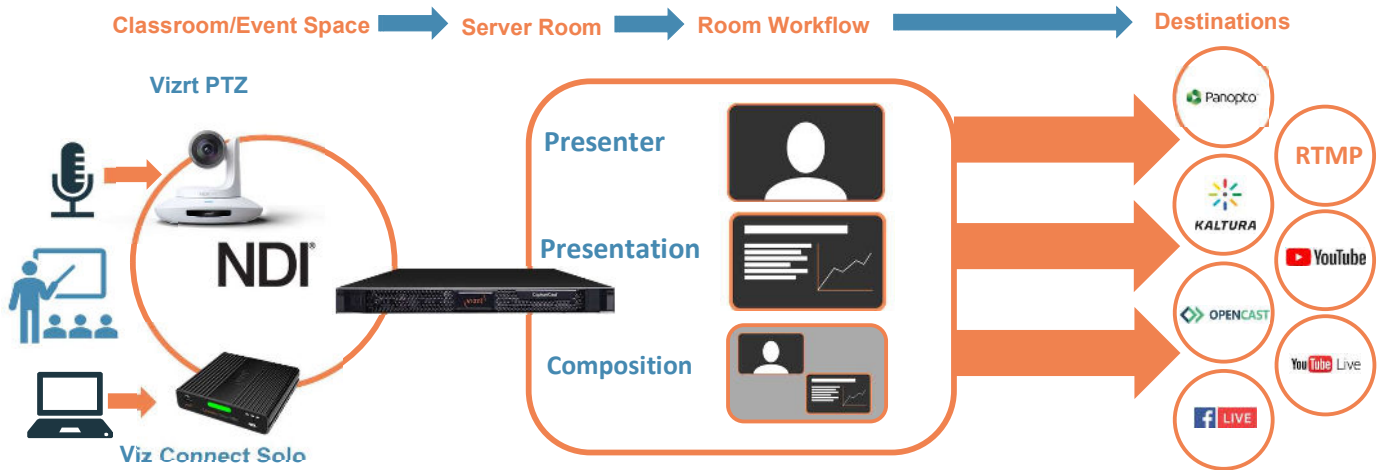

Rooms to Grow with You

Start with single space workflow licensing and enable up to 3x concurrent workflows as your AV and NDI® network grows.

Viz CaptureCast™ Workflow Example

Viz CaptureCast™ Spaces – Concurrent Workflows

	Single Source	Dual Source	Triple Source	Composition or PiP	Dual Source plus Composition
 CaptureCast	1	1	1	1	1
 + 1 Space Subscription	2	2	2	2	2
 + 2 Spaces Subscriptions	3	3	2	3	2
 CaptureCast Max License	3	3	2	3	2
